

# DCSM Ridge Anchor

## NEW Inverted Design!

DCSM now offers 2 different profiles of Ridge Anchor. Our standard profile and the new Inverted profile (see below).

We have developed the new inverted channel design to hold foam or adhesive making hip/ridge cap installation much easier. The inverted channel holds the foam or adhesive in place without running!

### SPECIFICATIONS:

- **Application:**
  - RT600 adhesive with screw
  - Foam (1 or 2 part) with screw
  - Foam or adhesive with no screw
- **Materials:**
  - 26 gauge mill finish \*Galvalume in 10' lengths
  - Other lengths available upon request
- **Sizes:**
  - Available in 5 standard sizes of 4", 5", 6", 7" or 8" for various tile profiles.
  - See our website for recommended sizes and profiles.
- **Product Approval:**
  - FBC product approval #FL-6046
  - FBC HVHZ approval # FL-8380
  - Quality Assurance Program
- **Fasteners:**
  - 1 1/2" self-sealing neoprene washer screws spaced 16" o/c.
  - Approved ring shank nails spaced 6" o/c., roof cement and membrane

\* All DCSM products are made from **Galvalume** not galvanized. Galvalume offers far superior corrosion resistance. Contact us for more details or literature.
